**ATTACH A COPY OF THE PROGRAM AGENDA**

- ➔ Make sure there is a brief description of the presentation titles, agendas with only presentation titles are not sufficient to permit proper evaluation of the course content. Failure to include descriptions will cause delay in processing and may affect approval for credit hours.

All courses need to provide a balanced program for applicators and dealers, which means that courses should include at least 4-5 of the 8 items in the *Standards for Pesticide Training* below:

1. Label and Labeling Comprehension
2. Worker Safety
3. Environmental Risk
4. Pest Identification, Biology, and Management
5. Pesticide and Chemical Control
6. Application Equipment
7. Calibration
8. Pesticide Laws and Regulations

For an expanded list of the *Standards for Pesticide Training* contact Janet Kirkland at the above address.

Courses will be evaluated as 2-6 credits depending on content and time.
